DO NOT CIRCULATE

25X1

1. Between 15 September and 4 October 1952, no air activity was observed at Neubrandenburg-Trollenhagen airfield. Work on the fence around the field was not resumed. No construction work was in progress. For a period of about eight weeks, gravel has been hauled to the field from a gravel pit located northeast of the outlying part of the Hellfeld farm.
2. A radio installation in a wooden shed, about 4 x 6 meters, was located in the eastern section of the field at the road to Glocksins. Four searchlights were also located there. Near the radio installation, there was a mast with 25 masts, 25 cm apart, and a metal rod on top which was about 5 meters long. The two top rungs were fitted at a right angle. About 10 meters from the wooden shed toward Glocksins, there was a truck bed with a device similar in appearance to a field kitchen.
3. Between 21 and 25 September, Soviet soldiers were observed at the field.

25X1¹. [REDACTED] Comment. The fighter regiment in Neubrandenburg was transferred to Buetnitz in March 1952. Since that date, Neubrandenburg airfield has been only occupied by a Soviet detail which, among other duties, was charged with the construction of a fence. Radio trucks and antennas had been removed. A wooden shed was erected near the inner landing beacon. The presence of one radio installation is confirmed by the present report. [REDACTED] Therefore, it is believed that the fighter regiment was not transferred permanently to Buetnitz airfield. The type of the device mounted on the truck superstructure cannot be identified.
